

2017-18 NCAA MEMBER INSTITUTIONS - TITLE IX ATHLETICS PARTICIPATION COMPLIANCE WITH PRONG ONE PROPORTIONALITY TEST

48 years following the adoption of Title IX, most institutions are expected to comply under Title IX's Prong One participation requirement: male and female athletic participation equal to the percent of males and females in the institution's undergraduate student body. Each school was given a generous buffer of 20 male or female participation opportunities above or below exact equal opportunity because a school does not need to add a team for the underrepresented sex unless the participation gap is equal to or more than the size of a team that could be added. Computation of the participation gap assumes that actual male participation remains constant and is equal to the percent of male undergraduates. The female gap represents the difference between opportunities actually provided to females and their entitlement if the percent of female athletes was equal to percent female undergraduate enrollment. [1]
